SPEAKERS OF
Klinikum rechts der Isar,
Technical University Munich, Germany

Prof. Dr. med. Peter Biberthaler
Director Department of Trauma Surgery

Prof. Dr. med. Stefan Huber-Wagner
Assistant Director, Deputy Head of the Department Trauma Surgery

Prof. Dr. med. Chlodwig Kirchhoff
Deputy Head of the Department Trauma Surgery - shoulder

Dr. med. Stefan Deiler
Deputy Head of the Department Trauma Surgery - hand

PD Dr. med. Marc Hanschen
Senior physician of the Department Trauma Surgery

EXTERNAL SPEAKERS

MD Martin McNally
Lead Surgeon Bone Infection Unit
Consultant Orthopaedic Surgeon Limb Reconstruction
Oxford University Hospitals NHS FT, Oxford UK

MD, Ph.D Andrej Trampuz
Center for Musculoskeletal Surgery
Head of the Infectious Diseases Research Laboratory at the Charité – University Medicine in Berlin, Germany

Prof. Dr. med. Michael Wenzl
Director, Clinic of Orthopaedics and Trauma Surgery
Klinikum Ingolstadt, Germany

MD, Ph.D Michael Diefenbeck,
Chief Medical Officer
Bonesupport AB, Lund, Sweden

VENUE
Auditorium „Pavillon´ (EG)
University Hospital rechts der Isar, TUM
Department for Trauma Surgery
Ismaninger Str. 22
81675 Munich

CONTACT AT THE HOSPITAL
Ulrike Jundi
Tel: (+49)89/4140 2126
Mail: ulrike.jundi@mri.tum.de

REGISTRATION
Please register until 15.6.2018
Mail: pia.carlsen@bonesupport.com

ORGANIZATION
Anneliese Wottke
Tel: (+49)173/6061 535
Mail: anneliese.wottke@bonesupport.com

12th – 13th July 2018
Klinikum rechts der Isar – Technical University Munich
Auditorium „Pavillon“

Scientific organisation:
Prof. Dr. Peter Biberthaler
Prof. Dr. Stefan Huber-Wagner

Under the patronage of ARTOF

CME-points are requested at the BLÄK

Dear colleagues,

It is a great pleasure for us to invite you to the first Munich bone defect and infection meeting.

The incidence of bone infections, as well as relevant bone defects is more and more increasing. Diagnosis and treatment are still complex and challenging. Interdisciplinarity between orthopaedic and trauma surgeons, plastic surgeons, vascular surgeons, anaesthesiologists and microbiologists is crucial to solve the problems of patients with bone infections or large bone defects.

While synthetic bone graft substitutes continue to play an increasing role in the treatment of many orthopaedic and posttraumatic conditions, they have recently achieved particular success and rapidly growing significance in the management of musculoskeletal infections.

During the last decades, the appropriate use of antibiotics and standardized surgical strategies has markedly improved prevention and treatment of bone and joint infections. However, there are still unsolved questions and increasingly complex clinical situations that are threatening our patients requiring new approaches and solutions.

The introduction of highly effective local antibiotic carriers in the field of bone infections has significantly improved outcomes. Therefore, the focus of the meeting is on the use of resorbable local antibiotic-eluting bone graft substitute carriers in complex clinical situations following trauma. Moreover, the need for an interdisciplinary and specialized team will be highlighted. The meeting addresses clinicians as well as practitioners dealing with such complex cases.

The dinner event on Thursday will allow for further discussion with the experts and colleagues in a pleasant and typically Bavarian atmosphere.

The meeting will be held at the annual scientific meeting of the TraumaNetwork "Munich-Oberbayern-Nord".

We are looking forward to welcoming you to the first Munich bone defect and infection meeting!

Prof. Dr. Stefan Huber-Wagner and Prof. Dr. Peter Biberthaler

### Thursday 12th of July

<table>
<thead>
<tr>
<th>Time</th>
