About BONESUPPORT™

BONESUPPORT is an innovative commercial stage orthobiologics company, based in Lund, Sweden. The Company develops and commercializes innovative injectable bio-ceramic bone graft substitutes that remodel to the patient's own bone and have the capability of eluting drugs directly into the bone void.

BONESUPPORT's bio-ceramic bone graft substitutes CERAMENT® BONE VOID FILLER (BVF), CERAMENT® G* and CERAMENT® V* are all based on the Company's novel and proprietary technology platform.

The Company's products are targeting a large addressable market opportunity across trauma, chronic osteomyelitis (bone infection), revision arthroplasty (replacement of a joint prosthesis), ortho-oncology and foot and ankle.

BONESUPPORT's total sales increased from SEK 62 million in 2015 to SEK 129 million in 2017, representing a compound annual growth rate of 45%.

BONESUPPORT is currently conducting two important clinical trials to generate data demonstrating the clinical and health economic benefits its products deliver. The first trial, CERTiFy, is comparing CERAMENT BVF with autograft, the most widely used approach for managing bone voids. Top line results from this study are due to be announced at the end of 2018. The FORTIFY study is assessing CERAMENT G's ability to improve on the standard-of-care

Press Release

management of patients with open fractures of the tibial diaphysis. The primary endpoints of the trial will include the absence of deep infection at the fracture site and a reduction in the number of secondary procedures intended to promote fracture union. Data from this study will be used for a planned Premarket approval filing with FDA in 2020.

The Company's research and development is focused on extending the use of its CERAMENT technology into further indications via the incorporation of additional drugs and therapeutic agents. The Company currently has a pipeline of pre-clinical product candidates that have been designed to promote bone growth.

BONESUPPORT is also preparing to expand its product offering in the US and has entered into strategic agreements with Collagen Matrix Inc. and MTF Biologics to gain access to products that are complementary to CERAMENT BVF.

BONESUPPORT is listed on Nasdaq Stockholm and trades under the ticker "BONEX" (ISIN code: SE0009858152). Further information is available at www.bonesupport.com.

*CERAMENT G: Not available in the United States, for investigational use only.
CERAMENT V: Not available in the United States.
